

Summary

Full-stack developer and systems architect who builds **SaaS products and automated systems** that hit hard under the hood yet feel effortless to use. I turn complex requirements into **production-ready software** — from optimizing backend pipelines and real-time services to architecting scalable systems with **Next.js, Node.js and PostgreSQL**, and shipping them to production on VPS with Nginx & Docker.

Experience

Full-Stack Developer — Hattrick Solutions

2024 — Present · Hybrid

Deliver client products end-to-end — backend services, REST/GraphQL & real-time APIs, admin panels and full-stack apps — from design to production deployment on VPS with Nginx & Docker. Shipped four live products across web and mobile (AutoPluss, CuriousMinds, KissnTells, Loliup).

Stack: Next.js · Node.js · Express · REST APIs · GraphQL · Socket.io · Agora · Prisma · PostgreSQL · Firebase · AWS · Docker · Nginx

Full-Stack Developer — Zuz

Jun 2023 — Jul 2024 · On-site

Worked across the stack on production SaaS products — building user-facing features for **Uptime**, **SimpleBackups** and **CloudFla**, and contributing backend development on CloudFla within an existing codebase.

Stack: TypeScript · JavaScript · PHP · jQuery · React · Next.js · Node.js · @zuzjs/ui

Self-Taught Foundation

Self-directed

Learned full-stack development, systems architecture and DevOps entirely hands-on — building real software instead of chasing certificates. Currently going lower-level with **Rust** and refining scalable deployment workflows.

Featured Work

- AutoPluss — Car-Service Marketplace

Backend

Built the backend, real-time voice calls, specialist shorts and the admin panel behind a two-sided marketplace. Live on Google Play & the App Store.

Node.js · Express · REST APIs · Agora · Firebase · Socket.io
- CuriousMinds — Day-Care Service Platform

Full-Stack · Solo

Designed and built the entire product single-handedly — marketing site, parent portal, admin panel, data model, APIs and deployment. Live at curiousmindsinspire.com.

Next.js · PostgreSQL · Prisma · Better Auth · AWS S3
- KissnTells — Dating & Nightlife Social App

Backend

Engineered the services behind AI matching, real-time rooms & chat, a live nearby map, Agora video calls and an in-app coin economy. Live on Google Play.

Node.js · Express · REST APIs · Socket.io · Agora · Prisma
- Loliup — Loyalty Management System

Backend

Extended a live GraphQL backend for digital loyalty cards, points and rewards — resolvers, scheduled jobs, email and push. Live on Google Play.

Node.js · Express · GraphQL · Prisma · PostgreSQL · Firebase

What I Do

- Backend daemons & APIs** — high-throughput servers in Node, Express, TypeScript & Rust.
- Database modeling** — optimized relational schemas & performance tuning.
- Frontend client apps** — reactive UIs with Next.js, React & Tailwind.
- CI/CD & DevOps** — automated builds and deployment pipelines.
